MEMORANDUM

TO: Thomas P. Skelly

Delegated to perform the functions and duties

of the Chief Financial Officer

FROM: Patrick J. Howard /s/

Assistant Inspector General for Audit

SUBJECT: FINAL AUDIT REPORT

Fiscal Year 2013 Closing Package Financial Statements

U.S. Department of Education

ED-OIG/A17N0003

Attached is the subject final report on the results of the audit of the closing package financial statements of the U.S. Department of Education for fiscal year 2013. The report should be read in conjunction with the Department's closing package financial statements and notes to fully understand the context of the information contained therein. The auditors have discussed the report with you or appropriate members of your staff at various times throughout the audit.

We appreciate the cooperation given CliftonLarsonAllen, LLP and the OIG, during the audit. Should you have any questions concerning the report, please contact me or Greg Spencer at 245-6949 or 245-6015, respectively.

INDEPENDENT AUDITORS' REPORT ON CLOSING PACKAGE FINANCIAL STATEMENTS

Inspector General
United States Department of Education

Chief Financial Officer
United States Department of Education

In our audit of the fiscal year (FY) 2013 closing package financial statements of the United States Department of Education (the Department), we found:

- The closing package financial statements are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America (U.S.);
- No material weaknesses in internal control over financial reporting; and
- No instances of reportable noncompliance with selected provisions of laws or regulations tested.

The following sections and Exhibits discuss in more detail: (1) these conclusions and other matters related to the closing package financial statements, (2) our conclusions in connection with our audit of the general purpose financial statements, (3) management's responsibilities, and (4) our responsibilities.

Report on the Closing Package Financial Statements

We have audited the FY2013 financial statements contained within the accompanying Closing Package Financial Statement Report (herein referred to as the closing package financial statements) of the Department, which comprise:

- the Closing Package Financial Statement Report Balance Sheet as of September 30, 2013 and 2012
- the related Closing Package Financial Statement Reports Statement of Net Cost and Statement of Changes in Net Position, for the years then ended
- the accompanying Financial Report (FR) Notes Report (except for the information in the FR Notes Report entitled "Threshold") for the years then ended
- the accompanying Additional Note No. 1
- the accompanying Trading Partner Summary Note Report Balance Sheet as of September 30, 2013 and 2012
- the related Trading Partner Summary Note Report Statement of Net Cost and Statement of Changes in Net Position for the years then ended

Management's Responsibility for the Closing Package Financial Statements

Management is responsible for the preparation and fair presentation of these closing package financial statements in accordance with U.S. generally accepted accounting principles. This includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of the closing package financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these closing package financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the U.S. and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the closing package financial statements are free from material misstatement. We also conducted our audit in accordance with Office of Management and Budget (OMB) Bulletin No. 14-02, *Audit Requirements for Federal Financial Statements* (OMB Bulletin 14-02).

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the closing package financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the closing package financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the agency's preparation and fair presentation of the closing package financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the agency's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant estimates made by management, as well as evaluating the overall presentation of the closing package financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion on the Closing Package Financial Statements

In our opinion, the closing package financial statements referred to above present fairly, in all material respects, the financial position of the Department as of September 30, 2013, and its net cost and changes in net position for the year then ended in conformity with accounting principles generally accepted in the U.S.

Emphasis of Matter

As discussed in Additional Note No. 1 to the closing package financial statements, the accompanying closing package financial statements were prepared to comply with the requirements of the U.S. Department of the Treasury's *Treasury Financial Manual* (TFM) Volume I, Part 2, Chapter 4700 for the purpose of providing financial information to the U.S. Department of the Treasury and the U.S. Government Accountability Office to use in preparing and auditing the *Financial Report of the U.S. Government*, and are not intended to be a complete presentation of the balance sheets of the Department as of September 30, 2013 and 2012, and the related statements of net cost and changes in net position, and combined

statements of budgetary resources (hereinafter referred to as "general-purpose financial statements") for the years then ended. Our opinion is not modified with respect to this matter.

Other Matters

We have audited, in accordance with auditing standards generally accepted in the U.S. and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States the general-purpose financial statements of the Department as of and for the year ended September 30, 2013, and our report thereon, dated December 11, 2013, expressed an unmodified opinion on those financial statements.

U.S. generally accepted accounting principles require that the information in Other Data Report No. 8, except for the information entitled "Threshold", (which is discussed below) be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Federal Accounting Standards Advisory Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the U.S., which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic closing package financial statements, and other knowledge we obtained during our audits of the closing package financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Management has omitted Management's Discussion and Analysis and the Combining Schedule of Budgetary Resources that U.S. generally accepted accounting principles require to be presented to supplement the basic closing package financial statements. Such missing information, although not a part of the basic closing package financial statements, is required by the Federal Accounting Standards Advisory Board who considers it to be an essential part of financial reporting for placing the general-purpose financial statements in an appropriate operational, economic, or historical context. Our opinion on the closing package financial statements is not affected by this missing information.

Other Information

Our audit was conducted for the purpose of forming an opinion on the basic closing package financial statements as a whole. The information in the sections included in the Other Data Report No. 16; the information entitled "Threshold" in Other Data Report No. 8 and the information in the sections entitled "Threshold" in FR Notes Report No. 2, 4A, 8,15 and 19; the information in the Closing Package Line Reclassification Summary Report – Balance Sheet; and the information in the Closing Package Line Reclassification Summary Reports – Statement of Net Cost and Statement of Changes in Net Position are presented for purposes of additional analysis in accordance with TFM Chapter 4700 and are not a required part of the closing package financial statements. Such information has not been subjected to the auditing procedures applied in the audits of the closing package financial statements and, accordingly, we do not express an opinion or provide any assurances on it.

Prior Year General Purpose Financial Statements

The FY2012 general purpose and closing package financial statements of the Department were audited by other auditors whose reports, dated November 16, 2012, expressed unmodified opinions on those statements.

Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards

Report on Internal Control over Financial Reporting as a Result of our Audit of the Department's 2013 General Purpose Financial Statements

In accordance with *Government Auditing Standards*, we have also issued a combined report dated December 11, 2013 that discusses our consideration of the Department's internal control over financial reporting and the results of our tests of its compliance with certain provisions of laws, regulations, and other matters that are required to be reported under *Government Auditing Standards*. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Department's internal control and compliance, and should be read in conjunction with this report in considering the results of our audits of the closing package financial statements.

In our fiscal year 2013 audit of the basic general-purpose financial statements of the Department, we noted two significant deficiencies which are summarized below and in more detail in Exhibit A to our report on the general purpose financial statements.

Functionality and internal controls over some loan servicing systems need improvement

The Department's Federal Student Aid (FSA) office experienced significant issues with the initial functionality of two new loan servicing systems implemented at the beginning of FY2012. These issues directly impacted the reliability of borrower account information and the related financial statement balances throughout FY2012. Management identified, and the implemented corrective actions addressed, a number of the underlying system issues in FY2012. However, some of the remaining FY2012 issues, including new issues of lesser significance identified in FY2013, continued to impact the reliability of borrower account information and related financial statement balances throughout FY2013.

The Department and FSA management need to mitigate persistent Information Technology (IT) control deficiencies

Due to the unique requirements of the Department's grant, loan and administrative business activities, the Department oversees a large portfolio of government-owned/government operated, government-owned/contractor-operated, and contractor-owned/contractor-operated information systems. Five FSA systems and one Department system comprise the key financial systems. The third party servicers who manage the Department and FSA's general support systems are monitored by management through the use of Service Level Agreements and independent reviews. For several years, financial and other

audits have identified numerous system deficiencies that affect the security and reliability of the information within these systems.

Report on Internal Control over Financial Reporting Specific to the Closing Package Financial Statements

In planning and performing our audit of the closing package financial statements as of and for the year ended September 30, 2013, we also considered the Department's internal control over the financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the closing package financial statements, but not for the purpose of expressing an opinion of the effectiveness of the Department's internal control. Accordingly, we do not express an opinion on the effectiveness of the Department's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in their normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis.

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness yet important enough to merit the attention by those charged with governance. Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Report on Compliance and Other Matters Specific to the Closing Package Financial Statements

As part of obtaining reasonable assurance about whether the Department's closing package financial statements are free from material misstatement, we also performed tests of its compliance with certain provisions of *TFM Chapter 4700*. However, providing an opinion on compliance with those provisions was not an objective of our audit of the closing package financial statements, and accordingly, we do not express such an opinion. The results of our tests of compliance with *TFM Chapter 4700* disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Agency Comments and our Evaluation

Management concurred with the results of our audit. We did not audit the Department's response and, accordingly, we express no opinion on it.

Purpose of the Other Reporting Required by Government Auditing Standards

The purpose of the communication provided in the Other Reporting Required by *Government Auditing Standards* section is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion

on the effectiveness of the Department's internal control or on compliance. This communication is an integral part of an audit performed in accordance with U.S. generally accepted government auditing standards in considering internal control and compliance with provisions of laws and regulations that have a material effect on the closing package financial statements. Accordingly, this communication is not suitable for any other purpose.

Restriction on Use of the Report on the Closing Package Financial Statements

This report is intended solely for the information and use of the Department's management, the U.S. Department of Education Office of Inspector General, the U.S. Department of the Treasury, OMB, and the U.S. Government Accountability Office in connection with the preparation and audit of the *Financial Report of the U.S. Government* and is not intended to be and should not be used by anyone other than these specified parties.

SUBJECT:

DRAFT AUDIT REPORT

Fiscal Year 2013 Closing Package Financial Statements

Control Number ED-OIG/A17N0003

Please convey my sincere thanks and appreciation to everyone on your staff who worked diligently on this financial statement audit. The Department has reviewed the draft Fiscal Year 2013 Closing Package Financial Statements Audit Report. Without exception, we concur and agree.

Again, please convey my appreciation to everyone on your staff whose efforts permitted the Department to complete the audit within the established timeframe.

Please contact Gary Wood, Director, Financial Management Operations, at (202) 245-8118 with any questions or comments.

Line	Question	Answer
1	Describe any significant events or transactions that occurred after the date of the Balance Sheet but before the issuance of agency¿s audited financial statements that have a material effect on the financial statements and, therefore, require adjustments or disclosure in the	The changes listed had no effect on total assets, liabilities, net position, or net cost of operations.
	statements.	As required by Treasury and Departmental guidance, excess collections from pre-1992 FFEL loan guarantees, the College Housing Loan program, and the Higher Education Facilities Loan program, which are payable to Treasury, are to be reported as non-current liabilities not covered by budgetary resources. This reclassification has resulted in a \$3 billion reduction of the FY 2012 reported balance of Intragovernmental Accounts Payable and a corresponding increase in the FY 2012 reported Other Liabilities balance.
		The presentation of the FY 2012 Liability for Loan Guarantees is in the liability section of the Balance Sheet, while the presentation of the FY 2013 liability is in the Credit Program Receivables Balance Sheet line item. The Liability for Loan Guarantees schedule in the notes presents both years.
2	Describe any departures from U.S. Generally Accepted Accounting Procedures (GAAP).	
3	When applying the general rule of the Statements of Federal Financial Accounting Standards	
	(SFFAS) No. 7, par. 48, describe the specific potential accruals that are not made and the practical and inherent	
	limitations affecting the	
	accrual of taxes and duties.	
4	Describe any change in accounting if a collecting entity adopts accounting standards that	
	embody a fuller application of accrual accounting concepts that differ from that prescribed by SFFAS No. 7,	
	par. 48.	
5	List all of the agency's components for which balances and activities are not combined into the agency's financial statements, and, therefore, are represented in the GFRS data.	
6	List all of the agency's components for which balances and activities are combined into the	The components whose balances and activities are combined into the financial
	agency's financial statements, and, therefore, are represented in the GFRS data.	statements and presented in the GFRS data are Federal Student Aid (FSA), Office of Elementary and Secondary Education (OESE), Office of Special Education and Rehabilitative Services (OSERS), Office of Vocational and Adult Education (OVAE), Office of Postsecondary Education (OPE), Institute of Education Sciences (IES), Office of English Language Acquisition (OELA), Office of Innovation and Improvement (OII), American Recovery and Reinvestment Act of 2009 and Educations Jobs Fund (RA/JF) activities, Office of Management, Office for Civil Rights (OCR), and Hurricane Education Recovery (HR) activities.

Line	Question	Answer
1	Provide a broad description of foreclosed property.	

Provide any other relevant information pertaining to this note. At a minimum, describe briefly

the significant accounting policies pertaining to this note.

The Department administers the William D. Ford Federal Direct Student Loan (Direct Loan) Program, to help students finance the costs of higher education. The Direct Loan Program, authorized by the Student Loan Reform Act of 1993, enables the Department to make loans directly to eligible undergraduate and graduate students and their parents through participating schools. Under this program, loans are made to individuals who meet statutorily set eligibility criteria and attend eligible institutions of higher education-public or private two- and four-year institutions, graduate schools, and vocational training schools.

The Federal Credit Reform Act of 1990 (Credit Reform Act) underlies the proprietary and budgetary accounting treatment of direct loans. The long-term cost to the government for direct loans, other than for general administration of the programs, is referred to as "subsidy cost." Under the Credit Reform Act, subsidy costs for loans obligated beginning in fiscal year 1992 are estimated at the net present value of projected lifetime costs in the year the loan is obligated. Subsidy costs are then revalued annually through the re-estimate process.

The Ensuring Continued Access to Student Loans Act of 2008 (ECASLA) amended the FFEL Program to authorize the Secretary to purchase or enter into forward commitments to purchase FFEL loans. This temporary loan purchase authority was to expire on September 30, 2009; however, Public Law (P.L.) 110-350 extended the authority through September 30, 2010. The Department has implemented three activities under this temporary loan purchase authority. These activities are: (1) loan purchase commitments under which the Department purchases loans directly from FFEL lenders; (2) loan participation purchases in which the Department purchases participation interests in FFEL loans; and (3) an Asset-Backed Commercial Paper (ABCP) Conduit in which the Department enters into a forward commitment to purchase FFEL loans from a conduit, as needed, to allow the conduit to repay short-term liquidity loans used to re-finance maturing commercial paper.

The Teacher Education Assistance for College and Higher Education Grant (TEACH) Program was implemented beginning July 1, 2008. This program, added to the HEA by the College Cost Reduction and Access Act (CCRAA), awards annual grants to students who agree to teach in a high-need subject area in a public or private elementary or secondary school that serves low-income students.

Estimates for credit program receivables and liabilities contain assumptions that have a significant impact on the financial statements. The primary components of this assumption set include, but are not limited to, collections (including loan consolidations), repayments, default rates, prevailing interest rates and loan volume. Actual loan volume, interest rates, cash flows and other critical components used in the estimation process may differ significantly from the assumptions made at the time the financial statements are prepared. Minor adjustments to any of these components may create significant changes to the estimate. The Department estimates all future cash

Line Question

Provide any other relevant information pertaining to this note. At a minimum, describe briefly the significant accounting policies pertaining to this note.

Answer

The Department administers the Federal Family Education Loan (FFEL) Program, to help students finance the costs of higher education. The FFEL Program, initially authorized by the Higher Education Act of 1965 (HEA), as amended, cooperates with state and private nonprofit Guaranty Agencies to provide loan guarantees and interest subsidies on loans made by private lenders to eligible students. Under this program, loans are made to individuals who meet statutorily set eligibility criteria and attend eligible institutions of higher education-public or private two- and four-year institutions, graduate schools, and vocational training schools.

The Federal Credit Reform Act of 1990 (Credit Reform Act) underlies the proprietary and budgetary accounting treatment of guaranteed loans. The long-term cost to the government for loan guarantees, other than for general administration of the programs, is referred to as "subsidy cost." Under the Credit Reform Act, subsidy costs for loans obligated beginning in fiscal year 1992 are estimated at the net present value of projected lifetime costs in the year the loan is obligated. Subsidy costs are then revalued annually through the re-estimate process.

Estimates for credit program receivables and liabilities contain assumptions that have a significant impact on the financial statements. The primary components of this assumption set include, but are not limited to, collections (including loan consolidations), repayments, default rates, prevailing interest rates and loan volume. Actual loan volume, interest rates, cash flows and other critical components used in the estimation process may differ significantly from the assumptions made at the time the financial statements are prepared. Minor adjustments to any of these components may create significant changes to the estimate. The Department estimates all future cash flows associated with the Direct Loan, FFEL and TEACH Programs. Projected cash flows are used to develop subsidy estimates. Subsidy cost can be positive or negative; negative subsidies occur when expected program inflows of cash (e.g., repayments and fees) exceed expected outflows. Subsidy cost is recorded as the initial amount of the loan guarantee liability when guarantees are made or as a valuation allowance to government-owned loans and interest receivable (i.e., direct and defaulted guaranteed loans).

The Department uses a computerized cash flow projection Student Loan Model to calculate subsidy estimates for the Direct Loan, FFEL and TEACH Programs. Each year, the Department re-evaluates the estimation methods related to changing conditions. The Department uses a probabilistic technique to forecast interest rates based on different methods to establish the relationship between an event's occurrence and the magnitude of its probability. The Department's approach estimates interest rates under numerous scenarios and then bases interest rates on the average interest rates weighted by the assumed probability of each scenario occurring. Probabilistic methodology facilitates the modeling of the Department's unique loan programs.

For each program, cash flows are projected over the life of the loans, aggregated by loan type, cohort year and risk category. The loan's cohort year represents the year a

Question
Provide the physical quantity information by category for multiuse heritage assets that are

Provide the physical quantity information by category for multiluse neritage assets that are included in the "Line Item Notes" tab of this note (SFFAS No. 29, par 25).

Provide any other relevant information pertaining to this note and any material changes from the prior fiscal years' depreciation methods and capitalization thresholds. In addition, describe briefly the significant accounting policies pertaining to this note.

Answer

The Department capitalizes single items of property and equipment with a cost of \$50,000 or more that have an estimated useful life of two years or more. Additionally, the Department capitalizes bulk purchases of property and equipment with an aggregate cost of \$500,000 or more. A bulk purchase is defined as the purchase of like items related to a specific project, or the purchase of like items occurring within the same fiscal year that have an estimated useful life of at least two years. Property and equipment are depreciated over their estimated useful lives using the straight-line method of depreciation. Internal Use Software meeting the above cost and useful life criteria is also capitalized. Internal Use Software is either purchased off the shelf, internally developed, or contractor developed solely to meet the Department's needs.

Line Item Notes - Advances and prepayments (2013 - SEPTEMBER)	Please provide explanations for any amounts that have changed by 10% or more and or greater than 500,000 between the current fiscal year and prior fiscal year. (Unaudited)	These balances primarily represent estimated grant advances for ARRA and Education Jobs Fund appropriations. The decrease in the estimate from FY 2012 to FY 2013 is related to the decrease in the available balance of ARRA and Education Jobs Fund appropriations.
Line Item Notes - Advances and prepayments (2012 - SEPTEMBER)	Please provide explanations for any amounts that have changed by 10% or more and or greater than 500,000 between the current fiscal year and prior fiscal year. (Unaudited)	These balances primarily represent estimated grant advances for ARRA and Education Jobs Fund appropriations. The decrease in the estimate from FY 2012 to FY 2013 is related to the decrease in the available balance of ARRA and Education Jobs Fund appropriations.
Line Item Notes - Other assets (2013 - SEPTEMBER)	Please provide explanations for any amounts that have changed by 10% or more and or greater than 500,000 between the current fiscal year and prior fiscal year. (Unaudited)	The decrease is due to a decrease in in-process invoices for FFEL interest benefits and special allowance payments to lenders.
Line Item Notes - Other assets (2012 - SEPTEMBER)	Please provide explanations for any amounts that have changed by 10% or more and or greater than 500,000 between the current fiscal year and prior fiscal year. (Unaudited)	The decrease is due to a decrease in in-process invoices for FFEL interest benefits and special allowance payments to lenders.

Tab: Text Data		
Line	Question	Answer
1	Provide a description of advances and prepayments on the "Line Item Notes" tab for line 1.	Advances and Prepayments consist of payments made to grant recipients in advance of their expenditures and in-process invoices for interest benefits and special allowances for the FFEL Program.
2	Provide a description and related amounts for balances that exceed \$1 billion in the line titled "Other Assets" on the "Line Item Notes" tab.	
3	Provide the amounts that are designated as either non-hedging or hedging instruments.	
4	Provide any other relevant information pertaining to this note. At a minimum, describe briefly the significant accounting policies pertaining to this note.

Line	Question	Answer
1	Provide more details on the liabilities reported on the "Line Item Notes" tab for each line 1 through 21 by including a description of the significant related amounts and providing the page number and the documentation support by email to FRD's central mailbox at financial.reports@fms.treas.gov if amounts identified cannot be directly traced to the agency's financial report.	Other liabilities consists of liabilities not recognized in specific categories, including (but is not limited to) liabilities related to grants payable, and accrued liabilities related to ongoing continuous expenses such as Federal employee salaries and accrued employee annual leave.
2	Provide a description and related amounts for balances that exceed \$50 million on the Line Item Notes tab, line 21, "Other liabilities," and provide the page number of the agency's financial report where the amount is identified.	
3	Provide the amounts that are designated as either non-hedging or hedging instruments.	
4	Provide any other relevant information pertaining to this note. At a minimum, describe briefly the significant accounting policies pertaining to this note.

Line	Question	Answer
1	Provide the nature of the isurance contingencies.	
2	Provide the nature of the litigation contingencies, including the range of loss for probable liabilities.	
3	Provide the nature of the litigation contingencies including the range of loss for reasonably possible contingencies.	The Department is involved in various lawsuits incidental to its operations. The Treasury Judgment Fund pays judgments resulting from litigation against the Department. In the opinion of management, the ultimate resolution of pending litigation will not have a material effect on the Department's financial position.
4	Provide the total claim amount for cases assessed as "unable to determine" if significant. Also, provide a statement on whether this materiality affects the financial statements.	
5	Describe the other claims that may derive from treaties or international agreements.	
6	Provide any other relevant information pertaining to this note. At a minimum, describe briefly the significant accounting policies pertaining to this note.

Line	Question	Answer
1	Describe the lessee's leasing arrangements including the basis on which contingent rental payments are determined, the existence and terms of renewal or purchase options, escalation clauses and restrictions imposed by lease agreements.	The Department leases office space from the General Services Administration (GSA). The lease contracts with GSA for privately and publicly owned buildings are operating leases. Future lease payments are not accrued as liabilities, but expensed as incurred.
2	Explain any amounts listed in Section D in detail and reference the note, and/or location, in the agency¿s Performance and Accountability Report (PAR).	
3	Provide any other relevant information pertaining to this note. At a minimum, describe briefly the significant accounting policies pertaining to this note.

Line Question 1 Provide a description of the major education and training programs considered Federal investments in human

capital used in the "Other Data Info" tab (SFFAS No. 8, par. 94).

Answer

Federal Student Aid - The Office of Federal Student Aid administers need based financial assistance programs for students pursuing postsecondary education and makes available federal grants, direct loans, guaranteed loans, and work study funding to eligible undergraduate and graduate students.

Office of Elementary and Secondary Education - The Office of Elementary and Secondary Education provides leadership, technical assistance, and financial support to state and local educational agencies for the maintenance and improvement of preschool, elementary, and secondary education. Financial assistance programs support services for children in high-poverty schools, institutions for neglected and delinquent children, homeless children, certain Native American children, children of migrant families, and children who live on or whose parents work on Federal property.

Office of Special Education and Rehabilitative Services - The Office of Special Education and Rehabilitative Services supports state and local programs that assist in educating children, youth and adults with special needs to increase their level of employment, productivity, independence, and integration into the community. Funding is also provided for research to improve the quality of their lives.

Other Departmental Programs - Other Departmental Programs include, but are not limited to, making strategic investments in educational practices; funding research, evaluations, and information dissemination; enabling students with limited English proficiency to become proficient in English; funding vocational and technical education; and promoting reform, innovation and improvement in postsecondary education.

The American Recovery and Reinvestment Act of 2009 enacted on February 17, 2009 by P.L. 111-5, provided \$97.4 billion in funding for FY 2009 to the Department for improving schools, raising students' achievement, driving reform, and producing better results for

Line	Question				Answer children and young people for the long term health of the nation. Approximately 55 percent of the Department's Recovery Act funding was appropriated for the creation of a new State Fiscal Stabilization Fund with the goal to stabilize state and local government budgets to avoid reductions in education and other essential public services while driving education reform. The Department was tasked with promptly disbursing these funds through a variety of existing and new grant programs, while ensuring the transparency. P.L. 111-226, enacted on August 10, 2010, created the Education Jobs Fund which provided funding to the Department to assist in saving and creating jobs for the 2010-2011 school year. The Department was given the assignment to disburse these funds to states through formula grants promptly, while ensuring transparency and accountability overall.

Provide any other relevant information pertaining to this note. At a minumum, describe briefly the significant accounting policies pertaining to this note.

U.S. Department of Education FY 2013 Closing Package Financial Statements Additional Note No. 1- Closing Package Financial Statement Requirements

The Budget and Accounting Procedures Act of 1950 allows the Secretary of the Treasury to stipulate the format and requirements of executive agencies to furnish financial and operational information to the President and the Congress to comply with the Government Management Reform Act of 1994 (GMRA) (Pub. L. No. 103-356), which requires the Secretary of the Treasury to prepare and submit annual audited financial statements of the executive branch. The Secretary of the Treasury developed guidance in the U.S. Department of the Treasury's *Treasury Financial Manual* (TFM) Volume I, Part 2, Chapter 4700 to provide agencies with instructions to meet the requirements of GMRA. The TFM Chapter 4700 requires agencies to:

- Reclassify all line items and amounts on the comparative audited consolidated, department-level balance sheets, statement of net cost/income statement, statement of changes in net position, statement of social insurance, statements of changes in social insurance amounts, and statement or note on custodial activity, if applicable, to the closing package financial statements;
- 2. List closing package financial statement line item amounts identified as Federal by trading partner and amount;
- 3. Report notes information that is based on the Reclassified Balance Sheet line items and other notes information required to meet FASAB standards; and
- 4. Report other data information that is not based on the Reclassified Balance Sheet line items and other data noted information required to meet FASAB standards.

Summary of Significant Accounting Policies Reporting Entity and Programs

The U.S. Department of Education (the Department), a cabinet-level agency of the Executive Branch of the U.S. Government, was established by Congress under the *Department of Education Organization Act* (Public Law 96-88), which became effective on May 4, 1980. The Department is responsible, through the execution of its congressionally enacted budget, for administering direct loans, guaranteed loans, and grant programs, as discussed below.

The Department administers the William D. Ford Federal Direct Loan (Direct Loan) Program, the Federal Family Education Loan (FFEL) Program, the Federal Pell Grant (Pell Grant) Program, and the campus-based student aid programs to help students and their parents finance the costs of postsecondary education.

The Direct Loan Program, added to the *Higher Education Act of 1965* (HEA) in 1993 by the *Student Loan Reform Act of 1993*, authorizes the Department to make loans directly to eligible undergraduate and graduate students and their parents through participating schools. Under this program, the loans are made to individuals who meet eligibility criteria established by statute and attend eligible institutions of higher education—public or private two- and four-year institutions, graduate schools, and vocational training schools. Student borrowers who demonstrate financial need also may receive federal interest subsidies while the students are in school or in a deferment period.

The FFEL Program, authorized by the HEA, operates through state and private nonprofit guaranty agencies to provide loan guarantees and interest subsidies on loans made by private lenders to eligible students. The SAFRA Act, formerly the Student Aid and Fiscal Responsibility Act, which was included in the Health Care and Education Reconciliation Act of 2010 (HCERA) and became effective July 1, 2010, provided that no new FFEL loans would be made after June 30, 2010.

The Ensuring Continued Access to Student Loans Act of 2008 (ECASLA) authorized the Secretary of Education (Secretary) to purchase or enter into forward commitments to purchase FFEL loans. The Department implemented three activities under this temporary loan purchase authority. These activities are: (1) loan purchase commitments; (2) loan participation purchases; and (3) an Asset-Backed Commercial Paper (ABCP) Conduit.

The Federal Pell Grant Program provides need-based grants to low-income undergraduate and certain post baccalaureate students to promote access to postsecondary education.

The Teacher Education Assistance for College and Higher Education (TEACH) Grant Program was implemented beginning July 1, 2008. This program, added to the HEA by the *College Cost Reduction and Access Act*, awards annual grants to students who agree to teach in a high-need subject area in a public or private elementary or secondary school that serves low-income students.

Additionally, the Department administers numerous other grant programs and Facilities Loan Programs. Grant programs include grants to state and local entities for elementary and secondary education; special education and rehabilitative services grants; grants to support institutions of higher education; educational research and improvement grants; grants to assist low-income and first-generation college students to prepare for and transition into college; grants to improve our global awareness and competitiveness; and fellowships for college and graduate students. Through the Facilities Loan Programs, the Department administers low-interest loans to institutions of higher education for the construction and renovation of their facilities.

1

In addition to student loans and grants, the Department supports state and local education agencies through discretionary grants under a variety of authorizing legislation, which are awarded using a competitive process, and formula (mandatory) grants. Among the largest K-12 discretionary grants are The Federal TRIO Program (TRIO), Race to the Top, and Teacher Incentive Fund. Among the largest formula grants are Title I, *Elementary and Secondary Education Act of 1965*, as amended, (Title I) Grants to Local Educational Agencies and *Individuals with Disabilities Education Act* (IDEA) grants.

The American Recovery and Reinvestment Act of 2009 (Recovery Act), enacted on February 17, 2009, as Public Law 111-5, provided funding to the Department for improving schools, raising students' achievement, driving reform, and producing better results for children and young people for the long-term health of the nation.

Public Law 111-226 (Education Jobs Fund), enacted on August 10, 2010, provided funding to the Department for saving and creating education jobs.

As of fiscal year 2013, Recovery Act and Education Jobs Fund programs are winding down and have 4 percent and less than 1 percent remaining, respectively, to be expended as of September 30, 2013.

Reporting Groups

The Department has established five reporting groups that administer loan and grant programs. They are:

- Federal Student Aid (FSA)
- Office of Elementary and Secondary Education (OESE)
- American Recovery and Reinvestment Act and Education Jobs Fund (RA/JF)
- Office of Special Education and Rehabilitative Services (OSERS)
- Other

The "Other" reporting group consists of the Office of Vocational and Adult Education (OVAE), Office of Postsecondary Education (OPE), Institute of Education Sciences (IES), Office of English Language Acquisition (OELA), Office of Innovation and Improvement (OII), Office of Management, Office for Civil Rights (OCR), and Hurricane Education Recovery (HR) activities.

Basis of Accounting and Presentation

These financial statements have been prepared to report the financial position, net cost of operations, and changes in net position of the Department. The financial statements were prepared from the books and records of the Department, in accordance with accounting principles generally accepted in the United States of America for federal entities, issued by the Federal Accounting Standards Advisory Board, and the Office of Management and Budget (OMB) Circular No. A-136, *Financial Reporting Requirements*, as revised..

The Department's financial statements should be read with the realization that they are for a component of the U.S. Government, a sovereign entity. One implication of this is that the liabilities cannot be liquidated without legislation providing resources and legal authority to do so.

The accounting structure of federal agencies is designed to reflect both accrual and budgetary accounting transactions. Under the accrual method of accounting, revenues are recognized when earned, and expenses are recognized when a liability is incurred, without regard to receipt

or payment of cash. Budgetary accounting facilitates compliance with legal constraints and controls over the use of federal funds.

Intradepartmental transactions and balances have been eliminated from the consolidated financial statements.

Credit Reform Accounting: Federal Credit Reform

The Federal Credit Reform Act of 1990 (CRA) became effective on October 1, 1991. Its purpose is to measure the cost of Federal credit programs and to place the cost of each credit program on a basis equivalent with other Federal spending, i.e., calculate the cost of Direct Loan Programs evenly with the cost of Guaranteed Loan Programs. Under CRA, subsidy cost is estimated using the net present value of future cash flows to, and from, the Department.

A loan guarantee is any guarantee, insurance, or other pledge with respect to the payment of all or part of the principal or interest on any debt obligation of a non-Federal borrower to a non-Federal lender. A direct loan is any debt instrument issued to the public by the federal government. CRA establishes the use of Program, Financing, and General Fund Receipt Accounts for loan guarantees committed and direct loans obligated after September 30, 1991. It also establishes Liquidating Accounts for activity relating to any loan guarantees committed or direct loans obligated before October 1, 1991.

The Program Account is a budget account that receives and obligates appropriations to cover the subsidy cost of a direct loan or loan guarantee and disburses the subsidy cost to the Financing Account. A Program Account also receives appropriations for administrative expenses. The Financing Account is a non-budgetary account that records all of the cash flows resulting from CRA direct loans or loan guarantees. It disburses loans, collects repayments and fees, pays claims, borrows from U.S. Treasury, earns and pays interest, and receives the subsidy cost payment from the Program Account. The General Fund Receipt Account is a budget account used by Treasury for the receipt of amounts paid from the Financing Account when there are negative subsidies for original cost estimates or downward re-estimates of prior subsidy costs.

Use of Estimates

The preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make assumptions and estimates that directly affect the amounts reported in the financial statements. Actual results may differ from those estimates.

The Federal Credit Reform Act of 1990 (Credit Reform Act) underlies the proprietary and budgetary accounting treatment of direct and guaranteed loans. The long-term cost to the government for direct loans or loan guarantees, other than for general administration of the programs, is referred to as "subsidy cost." Under the Credit Reform Act, subsidy costs for loans obligated beginning in fiscal year (FY) 1992 are estimated at the net present value of projected lifetime costs in the year the loan is obligated. Subsidy costs are re-estimated annually.

Estimates for credit program receivables and liabilities contain assumptions that have a significant impact on the financial statements. The primary components of this assumption set include, but are not limited to, collections (including loan consolidations), repayments, default rates, prevailing interest rates, and loan volume. Actual loan volume, interest rates, cash flows, and other critical components used in the estimation process may differ significantly from the assumptions made at the time the financial statements are prepared. Minor adjustments to any of these components may create significant changes to the estimates and the amounts recorded.

The Department estimates all future cash flows associated with the Direct Loan, FFEL, and TEACH Programs. Projected cash flows are used to develop subsidy estimates. Subsidy cost can be positive or negative; negative subsidies occur when expected program inflows of cash (e.g., repayments and fees) exceed expected outflows. Subsidy cost is recorded as the initial amount of the loan guarantee liability when guarantees are made, or as a valuation allowance to government-owned loans and interest receivable (i.e., direct and defaulted guaranteed loans).

The Department uses a cash flow projection model to calculate subsidy estimates for the Direct Loan, FFEL, and TEACH Programs. Each year, the Department re-evaluates the estimation methods for changing conditions. In developing assumptions for future interest rates, the Department uses a probabilistic technique that estimates future interest rates and weighs each one by the assumed probability of each scenario occurring. For each program, cash flows are projected over the life of the loans, aggregated by loan type, cohort year, and risk category. The loan's cohort year represents the year a loan was obligated or guaranteed, regardless of the timing of disbursements. Risk categories include two-year colleges, graduate schools, proprietary (for-profit) schools, freshmen and sophomores at four-year colleges, as well as juniors and seniors at four-year colleges.

Estimates reflected in these financial statements were prepared using assumptions developed for the FY 2013 Mid-Session Review, a governmentwide exercise required annually by OMB. These estimates are based on the most current information available to the Department at the time the financial statements were prepared. Assumptions and their impact are updated after the Mid-Session Review to account for significant subsequent changes in activity. Management has a process to review these estimates in the context of subsequent changes in activity and assumptions, and to reflect the impact of changes, as appropriate.

The Department recognizes that cash flow projections and the sensitivity of changes in assumptions can have a significant impact on estimates. Management has attempted to mitigate fluctuations in the estimates by using trend analysis to project future cash flows. Changes in assumptions could significantly affect the amounts reflected in these financial statements. For example, a minimal change in the projected long-term interest rate charged to borrowers could change the current subsidy re-estimate by a significant amount.

Entity and Non-Entity Assets

Assets are classified as either entity or non-entity assets. Entity assets are those that the Department has authority to use for its operations. Non-entity assets are those held by the Department but not available for use in its operations. The Department combines its entity and non-entity assets on the Balance Sheet and discloses its non-entity assets in the notes.

Fund Balance with Treasury

The Fund Balance with Treasury includes general, financing, revolving, trust, special, and other funds in the Department's accounts with Treasury available to pay current liabilities and finance authorized purchases, as well as funds restricted until future appropriations are received. Treasury processes cash receipts and cash disbursements for the Department. The Department's records are reconciled with those of the Treasury.

A portion of the general funds is provided in advance by multiyear appropriations for obligations anticipated during the current and future fiscal years. Revolving funds conduct continuing cycles of business-like activity and do not require annual appropriations. Their fund balance is derived from borrowings, as well as collections from the public and other federal agencies. Other funds, which are non-budgetary, primarily consist of deposit and receipt funds and clearing accounts. Non-budgetary Credit Reform Financing Accounts have many similarities to revolving funds.

Available unobligated balances represent amounts that are apportioned for obligation in the current fiscal year. Unavailable unobligated balances represent amounts that are not apportioned for obligation during the current fiscal year and expired appropriations no longer available to incur new obligations. Obligated balances not yet disbursed include undelivered orders and unpaid expended authority.

Accounts Receivable

Accounts Receivable are amounts due to the Department from the public and other federal agencies. Receivables from the public result from overpayments to recipients of grants and other financial assistance programs, and disputed costs resulting from audits of educational assistance programs. Amounts due from federal agencies result from reimbursable agreements entered into by the Department with other agencies to provide various goods and services. Accounts receivable are reduced to net realizable value by an allowance for uncollectible amounts. The estimate of an allowance for loss on uncollectible accounts is based on the Department's experience in the collection of receivables and an analysis of the outstanding balances.

Cash and Other Monetary Assets

Cash and Other Monetary Assets consist of guaranty agency reserves that represent the federal government's interest in the net Federal Fund assets of state and nonprofit FFEL Program guaranty agencies. Guaranty agency Federal Fund reserves are classified as non-entity assets with the public and are offset by a corresponding liability due to Treasury. Guaranty agency reserves include initial federal start-up funds, receipts of federal reinsurance payments, insurance premiums, guaranty agency share of collections on defaulted loans, investment income, administrative cost allowances, and other assets.

Sections 422A and 422B of the HEA required FFEL guaranty agencies to establish a Federal Student Loan Reserve Fund (Federal Fund) and an Operating Fund. The Federal Fund and the non-liquid assets developed or purchased by a guaranty agency, in whole or in part with federal funds, are the property of the United States and reflected in the *Budget of the United States Government*. However, such ownership by the federal government is independent of the actual control of the assets.

The Department disburses funds to a guaranty agency. A guaranty agency, through its Federal Fund, pays lender claims and pays default aversion fees into its own Operating Fund. The Operating Fund is the property of the guaranty agency and is used by the guaranty agency to fulfill responsibilities that include repaying money borrowed from the Federal Fund and performing default aversion and collection activities. Payments made to the Department from guaranty agency federal funds through a statutory recall or agency closures represent capital transfers and are credited to the Department's Fund Balance with Treasury account.

Credit Program Receivables, Net and Liabilities for Loan Guarantees

The financial statements reflect the Department's estimate of the long-term cost of direct and guaranteed loans in accordance with the Credit Reform Act. Loans and interest receivable are valued at their gross amounts less an allowance for the present value of amounts not expected to be recovered and thus having to be subsidized—called "allowance for subsidy." The difference between the gross amount and the allowance for subsidy is the present value of the cash flows to and from the Department that are expected from the receivables over their projected lives. Similarly, liabilities for loan guarantees are valued at the present value of the cash outflows from the Department less the present value of related inflows. The estimated present value of net long-term cash outflows of the Department for subsidized costs is net of

recoveries, interest supplements, and offsetting fees. The Department also values all pre-1992 loans and loan guarantees at their net present values.

Credit program receivables for activities under the temporary loan purchase authority include the present value of future cash flows related to purchased loans. Subsidy is transferred, which may be prior to purchasing loans, and is recognized as subsidy expense in the Statement of Net Cost. The cash flows of these authorities also include inflows and outflows associated with the underlying or purchased loans and other related activities, including any positive or negative subsidy transfers.

Components of subsidy costs for loans and guarantees include defaults (net of recoveries); contractual payments to third-party private loan collectors who receive a set percentage of amounts collected; and, as an offset, origination and other fees collected. For direct loans, the difference between interest rates incurred by the Department on its borrowings from Treasury and interest rates charged to particular borrowers is also subsidized (or may provide an offset to subsidy if the Department's rate is less). The corresponding interest subsidy in loan guarantee programs is the payment of interest supplements to third-party lenders in order to pay down the interest rates on loans made by those lenders. Subsidy costs are recognized when direct loans or guaranteed loans are disbursed to borrowers and re-estimated each year.

Non-Budgetary Credit Reform Financing Accounts

Actual cash flows to and from the Government for direct loan and loan guarantee programs are recorded in separate Credit Reform Financing Accounts within the Treasury. These accounts borrow funds from Treasury, make direct loan disbursements, pay claims on guaranteed loans, collect principal and interest from borrowers, earn interest from Treasury on any uninvested funds, and transfer excess subsidy to Treasury's General Fund Receipt Account. Appropriations for new subsidy and subsidy re-estimates are received in program accounts and transferred to Non-Budgetary Credit Reform Financing Accounts.

Property and Equipment, Net

The Department capitalizes single items of property and equipment with a cost of \$50,000 or more that have an estimated useful life of two years or more. Additionally, the Department capitalizes bulk purchases of property and equipment with an aggregate cost of \$500,000 or more. A bulk purchase is defined as the purchase of like items related to a specific project, or the purchase of like items occurring within the same fiscal year that have an estimated useful life of at least two years. Property and equipment are depreciated over their estimated useful lives using the straight-line method of depreciation. Internal Use Software meeting the above cost and useful life criteria is also capitalized. Internal Use Software is either purchased off the shelf, internally developed, or contractor developed solely to meet the Department's needs.

The Department adopted the following useful lives for its major classes of depreciable property and equipment:

Depreciable Property and Equipment

(In Years)

Major Class
Useful Life

Information Technology, Internal Use Software, and Telecommunications Equipment
Furniture and Fixtures
5

Other Assets

The Department's Other Intragovernmental Assets primarily consist of advance payments to federal agencies as part of interagency agreements for various goods and services. The Department's other assets (with the public) consist of payments made to grant recipients in advance of their expenditures and in-process disbursements of interest benefits and special allowance payments for the FFEL Program.

Liabilities

Liabilities represent actual and estimated amounts to be paid as a result of transactions or events that have already occurred. However, no liabilities can be paid by the Department without budget authority. Liabilities for which an appropriation has not been enacted are classified as liabilities not covered by budgetary resources, and there is no certainty that an appropriation will be enacted. The government, acting in its sovereign capacity, can abrogate liabilities that arise from activities other than contracts. FFEL Program and Direct Loan Program liabilities are entitlements covered by permanent indefinite budget authority.

Accounts Payable

Accounts Payable include amounts owed by the Department for goods and services received from other entities and scheduled payments transmitted but not yet processed. The Department's accounts payable primarily consist of in-process grant and loan disbursements to the public.

Debt

The Department borrows from Treasury to provide funding for the Direct Loan, FFEL, and TEACH Programs. The liability to Treasury from borrowings represents unpaid principal at year-end. The Department repays the principal based on available fund balances. Interest on the debt is calculated at fiscal year-end using rates set by Treasury. These are rates generally fixed based on the rate for 10-year Treasury securities. In addition, the Federal Financing Bank (FFB) holds bonds issued by a designated bonding authority, on behalf of the Department, for the HBCU Capital Financing Program. The Department reports the corresponding liability for full payment of principal and accrued interest on bonds as a payable to the FFB.

Accrued Grant Liability

Disbursements of grant funds are recognized as expenses at the time of disbursement. Some grant recipients incur allowable expenditures as of the end of an accounting period but have not yet been reimbursed by the agency. The Department will accrue a liability for these allowable expenditures incurred that have not yet been reimbursed. The amount is estimated using statistical sampling as well as information on recent grant expenditures and unliquidated balances.

Net Position

Net position consists of unexpended appropriations and cumulative results of operations. Unexpended appropriations include undelivered orders and unobligated balances, except for federal credit financing and liquidating funds, and trust funds. Cumulative results of operations represent the net difference since inception between (1) expenses and (2) revenues and financing sources.

Personnel Compensation and Other Employee Benefits

Annual, Sick, and Other Leave. The liability for annual leave, compensatory time off, and other vested leave is accrued when earned and reduced when taken. Each year, the accrued annual leave account balance is adjusted to reflect current pay rates. Sick leave and other types of non-vested leave are expensed as taken. Annual leave earned but not taken, within established limits, is funded from future financing sources.

Retirement Plans and Other Retirement Benefits. Employees participate in either the Civil Service Retirement System (CSRS), a defined benefit plan, or the Federal Employees Retirement System (FERS), a defined benefit and contribution plan. For CSRS employees, the Department contributes a fixed percentage of pay.

FERS consists of Social Security, a basic annuity plan, and the Thrift Savings Plan. The Department and the employee contribute to Social Security and the basic annuity plan at rates prescribed by law. In addition, the Department is required to contribute to the Thrift Savings Plan a minimum of 1 percent per year of the basic pay of employees covered by this system, match voluntary employee contributions up to 3 percent of the employee's basic pay, and match one-half of contributions between 3 percent and 5 percent of the employee's basic pay. For FERS employees, the Department also contributes the employer's share of Medicare.

Contributions for CSRS, FERS, and other retirement benefits are insufficient to fund the programs fully and are subsidized by the Office of Personnel Management (OPM). The Department imputes its share of the OPM subsidy, using cost factors provided by OPM, and reports the full cost of the programs related to its employees.

Federal Employees' Compensation Act. The *Federal Employees' Compensation Act* (FECA) provides income and medical cost protection to covered federal civilian employees injured on the job, employees who have incurred work-related occupational diseases, and beneficiaries of employees whose deaths are attributable to job-related injuries or occupational diseases. The FECA Program is administered by the U.S. Department of Labor (DOL), which pays valid claims and subsequently seeks reimbursement from the Department for these paid claims.

The FECA liability consists of two components. The first component is based on actual claims paid and recognized by the Department as a liability. Generally, the Department reimburses DOL within two to three years once funds are appropriated. The second component is the estimated liability for future benefit payments based on unforeseen events, such as death, disability, medical, and miscellaneous costs as determined by DOL annually.

Intragovernmental Transactions

The Department's financial activities interact with and are dependent upon the financial activities of the centralized management functions of the federal government. Due to financial regulation and management control by OMB and Treasury, operations may not be conducted and financial positions may not be reported as they would if the Department were a separate, unrelated entity.

Reclassifications

Certain reclassifications were made to the FY 2012 financial statements and notes to conform to the current year presentation. These changes had no effect on total assets, liabilities, net position, or net cost of operations. During FY 2013, as required by Treasury and Departmental guidance, excess collections from pre-1992 FFEL loan guarantees, the College Housing Loan program, and the Higher Education Facilities Loan Program, which are payable to Treasury, are to be reported as non-current liabilities not covered by budgetary resources. This reclassification has resulted in a \$3 billion reduction of the FY 2012 reported balance of Intragovernmental

Accounts Payable and a corresponding increase in the FY 2012 reported Other Liabilities balance. In accordance with Treasury guidance on capital transfer accounting, excess collections from pre-1992 FFEL loan guarantees, the College Housing Loan Program, and the Higher Education Facilities Loan Program, which are payable to Treasury, but that have not yet been transferred, should be reported on Other Financing Sources on the Statement of Changes in Net Position, Transfers-Out was reduced by \$22 million while Negative Subsidy Transfers, Downward Subsidy Re-Estimates, and Other was increased by \$22 million.

Subsequent Events

The financial statements, notes, and required supplementary information do not reflect the effects of the subsequent event described below.

ABCP Conduit

The asset-backed commercial paper vehicle (ABCP Conduit) closes in the second quarter of 2014. Following Departmental policy that costs of the ABCP Conduit will be re-estimated after the program closes. A recovery of prior year obligations and the cancellation of borrowing authority in the amount of approximately \$71 billion will occur after the final re-estimate is completed.
